

Technical Requirement Document

Sophionix V 3.0

Introduction:

To develop a self-guided, interactive Contemplation Journal Web App that facilitates emotional healing and self-reflection through visual contemplation cards, journaling, and personalized guidance. The app includes a web-based user interface and a web-based super admin panel. Core features include journaling, mood tracking, card collections, guided journeys and subscription-based monetization.

Functional Requirements:

Users Interface (Web App):

➤ User Authentication & On-boarding:

❖ Sign Up:

✓ Methods:

- ✧ Email/password (credentials stored securely with encryption and hashing, e.g., bcrypt)
- ✧ Google OAuth (uses OAuth 2.0 token and refresh flow)
- ✧ Apple ID (via Apple Sign-In using JWT validation)

✓ Data Captured:

- ✧ Full name
- ✧ Email (unique, validated format)
- ✧ Password (if email signup; minimum 8 chars, includes upper, lower, number, symbol)
- ✧ Consent to Terms and Privacy Policy (checkbox, required)

❖ Login:

✓ Secure credential login:

- ✧ Email + password OR OAuth token
- ✧ Session management using JWT or secure HTTP-only cookies

✓ Face ID support: (Optional)

- ✧ Face ID (browser-supported WebAuthn APIs)
- ✧ Fallback to credentials if face ID fails

✓ Password Recovery:

- ✧ Email verification link (time-limited, single-use token)
- ✧ Password reset form (password strength validation + confirmation field)

The forum is always open in any case of discrepancy

Technical Requirement Document

Sophionix V 3.0

❖ User Stories

- ✓ As a new user, I want to sign up using email and password, Google, or Apple ID, so that I can quickly create an account on the platform.
- ✓ As a user signing up with email, I want to provide my full name, email, and password, so that my account can be created securely.
- ✓ As a user, I want my password to meet security requirements (minimum length and character rules), so that my account remains protected.
- ✓ As a user, I want to accept the Terms and Privacy Policy during sign-up, so that my account registration is valid.
- ✓ As a registered user, I want to log in using my email and password or social login, so that I can access my account securely.
- ✓ As a returning user, I want the system to manage my login session securely, so that I remain logged in without repeated authentication.
- ✓ As a user with a supported device, I want to log in using Face ID, so that I can access my account quickly without entering credentials.
- ✓ As a user who forgot my password, I want to receive a password reset link via email, so that I can regain access to my account.
- ✓ As a user resetting my password, I want to set a new secure password with confirmation, so that my account remains protected.

❖ On-boarding Tutorial (Optional):

- ✓ Multi-step walkthrough (React modal or carousel component)
- ✓ **Stored user preference:** has_completed_onboarding: boolean

❖ Setup User Preferences:

- ✓ **Reminders:** Daily/weekly push or email reminders (toggle switches, time selection)
- ✓ **Themes:** Light, Dark, auto (based on system)
- ✓ **Tone:** UI tone options like Friendly, Neutral, Motivational (stored as enum)

❖ User Stories

- ✓ As a new user, I want to see an optional onboarding tutorial, so that I can understand how to use the platform features.
- ✓ As a user, I want the onboarding to appear as a multi-step walkthrough, so that the system can guide me through the main functionalities step by step.
- ✓ As a user, I want the system to remember if I have completed the onboarding, so that I do not see the tutorial again.
- ✓ As a user, I want to set reminder preferences (daily or weekly), so that I can receive notifications or emails at my preferred time.
- ✓ As a user, I want to select my preferred app theme (Light, Dark, or Auto), so that the interface matches my viewing preference.
- ✓ As a user, I want to choose the UI tone (Friendly, Neutral, or Motivational), so that the platform experience feels personalized to me.

Technical Requirement Document

Sophionix V 3.0

➤ Guest Login

❖ Feature Overview

- ✓ The system shall allow users to enter the platform using Guest Login without creating an account.
- ✓ Guest users can:
 - View cards on the Home Page
 - Click a card to unlock its details for \$0.99
- ✓ Guest users cannot:
 - Save cards
 - Access premium cards
 - Use full platform features without Sign Up

❖ Guest Login Flow

- ✓ User opens the app.
- ✓ On the login screen, the user selects Continue as Guest.
- ✓ The system creates a temporary guest session.
- ✓ User is redirected to the Home Page.

❖ Guest Home Page

- ✓ The home page shall display:
 - Card titles and images
 - Blurred other details
 - Login button
 - Sign Up button
- ✓ Guest users can browse cards but cannot see full details.

❖ Card Unlock Flow (\$0.99)

- ✓ Guest user clicks a card.
- ✓ System opens the Card Preview Screen.
- ✓ Card details appear blurred with a message:
- ✓ Unlock full card details for \$0.99
 - User clicks Unlock.
 - System opens the Payment Screen.
 - After successful payment, the full card details become visible.

Technical Requirement Document

Sophionix V 3.0

❖ Guest Restrictions

- ✓ Guest users cannot:
 - Save cards
 - Bookmark cards
 - Access premium cards
- ✓ If the user clicks Save Card, the system shall display:
 - "Sign Up to save this card."

❖ Buttons:

- ✓ Login
- ✓ Sign Up

❖ Premium Content

- ✓ If a guest user tries to access Premium Cards, the system shall display:
- ✓ "Sign Up and purchase a subscription to view premium cards."

❖ User Stories

- ✓ As a user, I want to continue as a guest, so that I can explore the platform without signing up.
- ✓ As a guest user, I want to unlock a card by paying \$0.99, so that I can view its full details.
- ✓ As a guest user, I want to be prompted to sign up when saving a card, so that I can create an account to store content.
- ✓ As a guest user, I want to be informed that premium content requires a subscription, so that I know I must sign up.

➤ Home Dashboard:

❖ Daily Card Draw:

- ✓ Interactive card flip (Animation with state change)
- ✓ Card draw function randomly selects a card from library (with exclusion of recently viewed if needed)

❖ Display card details:

- ✓ Affirmation or journaling prompt
- ✓ Category, tags, artwork

❖ Mood Data Stored:

- ✓ Timestamp, selected mood/emotion, optional note
- ✓ Saved to analytics for trends and insights

The forum is always open in any case of discrepancy

Technical Requirement Document

Sophionix V 3.0

➤ Journal Interface:

❖ Write Entries:

- ✓ Text editor with rich text support (bold, italic, bullet points)
- ✓ Option to link journal to mood check-in or card of the day
- ✓ Auto-save drafts and manual save

❖ Voice Recording:

- ✓ WebRTC or Media Recorder API to record up to 1 minute (Multiple Time a day)
- ✓ Stored as .mp3 or .ogg files, uploaded to secure cloud storage
- ✓ Linked with journal entry metadata

❖ Tag Entries:

- ✓ Manual tag input with auto-complete
- ✓ **Tags include:** emotions (e.g., "angry", "peaceful"), themes (e.g., "growth", "stress"), keywords
- ✓ Tags stored as arrays or related tables for filtering

❖ Entry Management:

- ✓ View, edit, or delete entries (confirmation modal before deletion)
- ✓ Edit history optional (versioning support)

❖ Past Entries View:

- ✓ Calendar view (with entry highlights per day)
- ✓ Timeline view (chronological scrollable feed)
- ✓ Search & filter bar on top

❖ Filtering Options:

- ✓ By tag (multi-select dropdown)
- ✓ By associated card
- ✓ By mood/emotion
- ✓ By date range (calendar selector)

❖ User Stories

- ✓ As a user, I want to write journal entries using a rich text editor, so that I can format my thoughts with bold, italic, and bullet points.
- ✓ As a user, I want to link my journal entry with a mood check-in or card of the day, so that my reflections are connected with my daily activity.
- ✓ As a user, I want my journal entry to auto-save as a draft, so that I do not lose my writing progress.
- ✓ As a user, I want to manually save my journal entry, so that it is stored permanently in my journal history.
- ✓ As a user, I want to record a voice note (up to 1 minute), so that I can express my thoughts through audio instead of text.
- ✓ As a user, I want my voice recordings to be securely stored and linked with my journal entry, so that I can access them later.

The forum is always open in any case of discrepancy

Technical Requirement Document

Sophonix V 3.0

- ✓ As a user, I want to add tags to my journal entries, so that I can organize my entries based on emotions, themes, or keywords.
- ✓ As a user, I want tag suggestions with auto-complete, so that tagging my entries becomes faster and easier.
- ✓ As a user, I want to view, edit, or delete my journal entries, so that I can manage my personal records.
- ✓ As a user, I want to see a confirmation message before deleting an entry, so that I do not accidentally remove important content.
- ✓ As a user, I want to view my past journal entries in a calendar view, so that I can easily find entries by date.
- ✓ As a user, I want to view my entries in a timeline feed, so that I can scroll through my journal history chronologically.
- ✓ As a user, I want to search and filter my journal entries, so that I can quickly find specific reflections.
- ✓ As a user, I want to filter entries by tags, cards, mood, or date range, so that I can analyze my thoughts and emotions over time.

➤ **Card Library:**

❖ **Collections:**

- ✓ Default (free) and Premium (unlocked via subscription or purchase)
- ✓ Cards grouped into decks (e.g., Mindfulness, Confidence, Relationships)

❖ **Browsing Options:**

- ✓ Browse manually (scroll or search)
- ✓ Random draw option
- ✓ Filter by collection, theme, mood

❖ **Card Details Display:**

- ✓ **Front:** Title, artwork/icon/pattern
- ✓ **Back:**
 - ✧ Message (short affirmation or guidance)
 - ✧ Prompt (question or journaling topic)
 - ✧ Themes (e.g., self-love, mindfulness)

❖ **User Stories**

- ✓ As a user, I want to access both default (free) and premium cards, so that I can explore content based on my subscription or purchases.
- ✓ As a user, I want cards to be grouped into decks (e.g., Mindfulness, Confidence), so that I can browse by category easily.
- ✓ As a user, I want to browse cards manually by scrolling or searching, so that I can find specific cards I like.
- ✓ As a user, I want a random draw option, so that I can discover new cards spontaneously.
- ✓ As a user, I want to filter cards by collection, theme, or mood, so that I can quickly find content relevant to my current needs.

The forum is always open in any case of discrepancy

Technical Requirement Document

Sophonix V 3.0

- ✓ As a user, I want to see the front of a card with its title and artwork, so that it looks appealing and identifiable.
- ✓ As a user, I want to flip the card to see its back, showing the message, prompt, and themes, so that I can read the guidance or journaling topic.
- ✓ As a user, I want premium card content to be unlocked via subscription or one-time purchase, so that I can access all cards I am interested in.

➤ Profile & Settings:

❖ Profile Management:

- ✓ Avatar upload (with image cropping)
- ✓ Display name update
- ✓ Email (read-only unless re-authenticated)

❖ Appearance:

- ✓ Dark mode / Light mode / Auto-switching (based on system preference)
- ✓ Theme color options (accent colors for UI)

❖ Notification Settings:

- ✓ Reminders toggle (enable/disable)
- ✓ Custom schedule (time picker, repeat days)
- ✓ Notification type: Push, Email, Both

❖ Export Options:

- ✓ **Journal export:**
 - ✧ PDF (formatted with timestamps, tags)
 - ✧ CSV (structured data for import)
 - ✧ Filtered export (date range, tags)

❖ User Stories

- ✓ As a user, I want to upload and crop my avatar, so that my profile picture looks the way I want.
- ✓ As a user, I want to update my display name, so that others see the correct name on my profile.
- ✓ As a user, I want my email to be read-only unless I re-authenticate, so that my account stays secure.
- ✓ As a user, I want to switch between Dark, Light, or Auto themes, so that the app appearance matches my preference or system settings.
- ✓ As a user, I want to choose accent colors for the UI, so that the interface feels personalized.
- ✓ As a user, I want to enable or disable reminders, so that I receive notifications only when I want.
- ✓ As a user, I want to set a custom schedule for notifications with time and repeat days, so that reminders fit my routine.
- ✓ As a user, I want to choose notification type (Push, Email, or Both), so that I get alerts in my preferred way.

The forum is always open in any case of discrepancy

Sophionix V 3.0

Super Administrator Interface (Web Based):

➤ Authentication:

❖ Admin Login with 2FA (Optional):

- ✓ Secure login with email + password
- ✓ Two-Factor Authentication (TOTP via Google Authenticator or email-based OTP)
- ✓ Token-based session management (JWT with refresh tokens)
- ✓ Brute-force protection (rate limiting, CAPTCHA)

❖ Role-Based Access:

✓ Roles:

- ✧ **Super Admin:** Full access to all system modules
- ✧ **Content Manager:** Limited to content creation/editing (cards, prompts, journeys)
- ✧ Permissions managed through RBAC (Role-Based Access Control) middleware
- ✧ Role assignments stored per user record (e.g., role: 'super_admin' | 'content manager')

❖ User Stories

- ✓ As a super administrator, I want to log in using email and password, so that I can securely access the admin interface.
- ✓ As a super administrator, I want Two-Factor Authentication (TOTP or email OTP), so that my account is protected from unauthorized access.
- ✓ As a super administrator, I want the system to manage sessions with JWT and refresh tokens, so that my login remains secure and valid.
- ✓ As a super administrator, I want brute-force protection with rate limiting and CAPTCHA, so that login attempts are secure against attacks.
- ✓ As a super administrator, I want to assign and manage roles for other admins, so that access to modules is controlled based on responsibilities.
- ✓ As a super administrator, I want Role-Based Access Control (RBAC) enforced, so that each admin can only access the features their role allows.
- ✓ As a super administrator, I want role assignments stored per user record, so that permissions are clear and auditable.

Technical Requirement Document

Sophonix V 3.0

➤ Dashboard:

❖ Statistics Overview:

- ✓ Total Users (from users table)
- ✓ Active Users (logged in within last 7/30 days)
- ✓ Daily Card Draws (query from card draw logs)
- ✓ Total Journal Entries (query from journal entries table)

❖ Subscription Summary:

- ✓ **Breakdown:** Free vs Premium (group by subscription tier)
- ✓ Active trials (based on start and expiry dates)

❖ Activity Feed:

- ✓ Real-time or polled feed of:
 - ✧ New sign-ups
 - ✧ Journal entries with flagged content
 - ✧ Recent logins

❖ User Stories

- ✓ As a super administrator, I want to see total users, so that I know the platform's overall user base.
- ✓ As a super administrator, I want to see active users for the last 7 and 30 days, so that I can monitor engagement trends.
- ✓ As a super administrator, I want to see daily card draws, so that I can track how often users interact with cards.
- ✓ As a super administrator, I want to see total journal entries, so that I can understand content creation activity.
- ✓ As a super administrator, I want to view subscription breakdown (Free vs Premium), so that I can analyze revenue and user tier distribution.
- ✓ As a super administrator, I want to see active trials with start and expiry dates, so that I can monitor trial users and potential conversions.
- ✓ As a super administrator, I want to see new sign-ups in the activity feed, so that I can track user growth in real time.
- ✓ As a super administrator, I want to see flagged journal entries, so that I can review sensitive content promptly.
- ✓ As a super administrator, I want to see recent logins, so that I can monitor platform activity and engagement.

Technical Requirement Document

Sophonix V 3.0

➤ User Management:

❖ User List View:

- ✓ Table with pagination and filters:
 - ✧ By email, name, subscription, status, last login
 - ✧ Search with partial match indexing
 - ✧ Sortable columns (created date, subscription type, activity level)

❖ User Profile View:

- ✓ **Journal statistics:** Total entries, average mood, last journaled
- ✓ **Subscription details:** Tier, start/end, payment status
- ✓ Device/platform info, time zone

❖ Admin Actions:

- ✓ **Deactivate Account:** Flag user as inactive, block login
- ✓ **Reset Password:** Generate reset token and send email
- ✓ **Delete User:** Soft delete (flagged is deleted: true) or hard delete (DB purge)

❖ Manual Overrides:

- ✓ **Grant Premium Access:** Directly assign premium tier, optionally time-limited
- ✓ **Extend Trial:** Modify trial period expiration date manually

❖ User Stories

- ✓ As a super administrator, I want to view a list of users in a table with pagination, so that I can manage users efficiently.
- ✓ As a super administrator, I want to filter users by email, name, subscription, status, and last login, so that I can quickly find specific users.
- ✓ As a super administrator, I want to search users with partial match indexing, so that I can locate users even if I don't have full details.
- ✓ As a super administrator, I want sortable columns for created date, subscription type, and activity level, so that I can analyze users easily.
- ✓ As a super administrator, I want to view user profile details, including journal statistics, subscription info, and device/platform data, so that I can understand each user's activity.
- ✓ As a super administrator, I want to deactivate a user account, so that I can block login for inactive or problematic users.
- ✓ As a super administrator, I want to reset a user's password, so that I can help users regain access securely.
- ✓ As a super administrator, I want to delete users (soft or hard delete), so that I can manage user data according to policy.
- ✓ As a super administrator, I want to grant premium access manually, so that I can directly upgrade users or provide special access.
- ✓ As a super administrator, I want to extend a user's trial period, so that I can manage trial expirations manually.

The forum is always open in any case of discrepancy

Technical Requirement Document

Sophionix V 3.0

➤ Content Management:

❖ Card Library Management:

- ✓ Create/Edit/Delete Cards
- ✓ Fields: title, message, prompt, image URL, tags, collection, is premium

❖ Image Upload:

- ✓ Via drag-drop interface with compression and size limit
- ✓ Stored in S3 or Firebase Storage

❖ Categorization:

- ✓ Categories (e.g., Confidence, Mindfulness)
- ✓ Themes (emotion-linked, searchable)
- ✓ Tags (user-defined, freeform or from preset list)

❖ Journal Prompt Management:

- ✓ Create/edit/delete prompt templates
- ✓ Fields: prompt text, linked cards, linked themes, prompt type
- ✓ Assign prompts to multiple categories

❖ Daily Card Scheduler:

- ✓ Schedule calendar interface
- ✓ Assign specific card to a date
- ✓ Schedule triggers push notification (using Firebase/One Signal)

❖ User Stories

- ✓ As a super administrator, I want to create, edit, and delete cards, so that I can manage the card library for all users efficiently.
- ✓ As a super administrator, I want to add card details like title, message, prompt, image URL, tags, collection, and premium status, so that each card is complete, categorized, and ready for users.
- ✓ As a super administrator, I want to upload images via drag-and-drop with compression and size limits, so that images are optimized and stored securely.
- ✓ As a super administrator, I want to categorize cards by categories, themes, and tags, so that users can browse and filter content easily.
- ✓ As a super administrator, I want to create, edit, and delete journal prompt templates, so that journaling guidance is relevant and up to date.
- ✓ As a super administrator, I want to link prompts to cards, themes, and multiple categories, so that content is organized, consistent, and reusable.
- ✓ As a super administrator, I want to schedule daily cards using a calendar interface, so that specific cards appear to users on intended dates.
- ✓ As a super administrator, I want the daily card schedule to trigger push notifications, so that users receive timely reminders for their daily cards.

The forum is always open in any case of discrepancy

Technical Requirement Document

Sophionix V 3.0

➤ Guided Journeys:

❖ Journey Creation & Editing:

- ✓ Define multi-day guided series (e.g., "7-Day Healing")
- ✓ Assign daily content:
 - ✧ Card
 - ✧ Prompt
 - ✧ Quote
 - ✧ Audio file (optional, uploaded or linked)
- ✓ Fields:
 - ✧ title, description, duration days, daily content [], access level, thumbnail

❖ Access Settings:

- ✓ access type: free OR premium

❖ The admin panel shall allow administrators to:

- ✓ Enable / disable guest login
- ✓ Set card unlock price (\$0.99)
- ✓ Control which cards allow guest preview
- ✓ View analytics of guest unlock purchases

❖ User Stories

- ✓ As a super administrator, I want to create and edit multi-day guided journeys, so that I can manage structured programs for all users.
- ✓ As a super administrator, I want to assign daily content for each journey, including cards, prompts, quotes, and optional audio files, so that each day delivers complete and engaging content.
- ✓ As a super administrator, I want to fill journey fields like title, description, duration, daily content array, access level, and thumbnail, so that journeys are fully defined and visually clear for users.
- ✓ As a super administrator, I want to set the access type for a journey (free or premium), so that content access aligns with subscription or purchase rules.

➤ Admin Control

❖ The admin panel shall allow administrators to:

- ✓ Enable / disable guest login
- ✓ Set card unlock price (\$0.99)
- ✓ Control which cards allow guest preview
- ✓ View analytics of guest unlock purchases

The forum is always open in any case of discrepancy

Technical Requirement Document

Sophonix V 3.0

❖ User Stories

- ✓ As a super administrator, I want to enable or disable guest login, so that I can control whether users can access the platform without signing up.
- ✓ As a super administrator, I want to set the card unlock price, so that I can manage the monetization for guest users.
- ✓ As a super administrator, I want to control which cards are available for guest preview, so that I can limit access to select content.
- ✓ As a super administrator, I want to view analytics of guest unlock purchases, so that I can track revenue and user engagement from guest interactions.

➤ Notifications:

❖ Push Notifications:

✓ Segmentation options:

- ✧ By mood (e.g., all users who selected "anxious" this week)
- ✧ By activity (e.g., journaled less than 2 times in a week)

✓ Compose:

- ✧ Title, message, CTA (optional deep link to app section)

❖ Email Notifications:

✓ Templates for:

- ✧ Onboarding steps
- ✧ Promotional campaigns
- ✧ Weekly newsletter

- ✓ **Integration:** SendGrid, Mailchimp, or custom SMTP
- ✓ Option to schedule or send immediately

❖ User Stories

- ✓ As an admin, I want to send push notifications segmented by user mood, so that messages are personalized and relevant.
- ✓ As an admin, I want to send push notifications based on user activity, so that I can encourage engagement (e.g., users who journaled less than twice a week).
- ✓ As an admin, I want to compose push notifications with title, message, and optional CTA, so that users can act directly from the notification.
- ✓ As an admin, I want to use email templates for onboarding, promotions, and weekly newsletters, so that communications are consistent and efficient.
- ✓ As an admin, I want to send emails via SendGrid, Mailchimp, or custom SMTP, so that delivery is reliable and trackable.
- ✓ As an admin, I want to schedule notifications or send them immediately, so that I can manage timing according to campaigns or user behavior.

Technical Requirement Document

Sophionix V 3.0

➤ Subscription & Payments:

❖ Billing Dashboard:

- ✓ Overview of current revenue
- ✓ Trial to paid conversion rate
- ✓ Upcoming renewals and expirations

❖ Tracking Tools:

- ✓ Integration with Stripe/Revenue Cat
- ✓ Real-time update via webhook endpoints

❖ Pricing Tier Management:

- ✓ CRUD for plans: name, description, price, duration, features
- ✓ Visibility: public/internal/test-only flags

❖ Coupons and Discounts:

- ✓ Create/manage codes:
 - ✧ **Type:** Percentage or flat rate
 - ✧ **Validity:** Start/end dates, usage limits
 - ✧ **Applicability:** Plans, users, or campaigns

❖ User Stories

- ✓ As a super administrator, I want to view an overview of current revenue, so that I can monitor the platform's financial performance.
- ✓ As a super administrator, I want to see trial-to-paid conversion rates, so that I can track how many users upgrade to paid subscriptions.
- ✓ As a super administrator, I want to view upcoming renewals and expirations, so that I can anticipate revenue and manage subscription timelines.
- ✓ As a super administrator, I want to integrate with Stripe or RevenueCat, so that subscription payments and billing are tracked accurately.
- ✓ As a super administrator, I want real-time updates via webhook endpoints, so that I always have current subscription and payment data.
- ✓ As a super administrator, I want to create, edit, and delete subscription plans, including name, description, price, duration, and features, so that I can manage the pricing tiers efficiently.
- ✓ As a super administrator, I want to control plan visibility (public, internal, or test-only), so that I can manage which plans are available to users.
- ✓ As a super administrator, I want to create and manage coupons or discount codes, so that I can run promotions and provide incentives.
- ✓ As a super administrator, I want to set coupon type (percentage or flat rate), validity, usage limits, and applicability, so that discounts are applied correctly to plans, users, or campaigns.

Technical Requirement Document

Sophionix V 3.0

➤ Analytics:

❖ Usage & Trends:

✓ Card Usage Frequency:

- ✧ Top cards drawn, draw rate by category

✓ Common Themes/Moods:

- ✧ Aggregate tags/emotions used in journals

✓ Mood Trends:

- ✧ Visual mood graph over time (aggregate)
- ✧ Filter by time, region, user cohort

❖ User Retention Metrics:

- ✓ DAU/WAU/MAU (daily, weekly, monthly active users)
- ✓ Retention cohorts (1-day, 7-day, 30-day retention)
- ✓ **Churn indicators:** last activity, subscription drop-offs

❖ Export Options:

- ✓ Download CSV or PDF reports
- ✓ Scheduled exports via email

❖ User Stories

- ✓ As a super administrator, I want to see card usage frequency, including top cards drawn and draw rates by category, so that I can understand user engagement with content.
- ✓ As a super administrator, I want to analyze common themes and moods from journal entries, so that I can identify trends in user emotions and interests.
- ✓ As a super administrator, I want to view visual mood trends over time, with filters by time, region, or user cohort, so that I can track changes and patterns in user behavior.
- ✓ As a super administrator, I want to track DAU, WAU, and MAU, so that I can measure daily, weekly, and monthly active user engagement.
- ✓ As a super administrator, I want to analyze retention cohorts (1-day, 7-day, 30-day), so that I can understand how users return to the platform over time.
- ✓ As a super administrator, I want to monitor churn indicators, such as last activity and subscription drop-offs, so that I can identify at-risk users.
- ✓ As a super administrator, I want to export reports in CSV or PDF, so that I can share and review analytics offline.
- ✓ As a super administrator, I want to schedule automated report exports via email, so that I can receive regular analytics updates without manual effort.

Technical Requirement Document

Sophionix V 3.0

➤ System Settings:

❖ App Branding:

- ✓ Upload/change logo, primary colors, typography presets
- ✓ Global theme updates pushed to all frontends

❖ App Default Configurations:

- ✓ **Daily card behavior:** random, preset, per user
- ✓ **Onboarding content steps:** editable via rich-text editor
- ✓ Default reminders (enable/disable)

❖ Admin Access Logs & Permissions:

- ✓ View all admin actions (create, edit, delete logs with timestamps)
- ✓ Assign/remove roles
- ✓ Audit trail for sensitive changes (e.g., subscription overrides)

❖ User Stories

- ✓ As a super administrator, I want to upload or change the app logo, primary colors, and typography presets, so that the platform reflects current branding.
- ✓ As a super administrator, I want global theme updates to be pushed to all frontends, so that all users see consistent styling.
- ✓ As a super administrator, I want to configure default app behaviors, including daily card behavior (random, preset, per user), onboarding steps, and default reminders, so that the platform functions according to organizational standards.
- ✓ As a super administrator, I want to view all admin actions with timestamps, so that I can audit changes and ensure accountability.
- ✓ As a super administrator, I want to assign or remove admin roles, so that access and permissions are controlled appropriately.

Technical Requirement Document

Sophionix V 3.0

Non-Functional Requirements:

➤ Security:

- ❖ Data encryption (at rest and transit)
- ❖ GDPR compliance
- ❖ Role-based access
- ❖ Activity logging
- ❖ Secure token-based authentication

➤ Performance:

- ❖ Fast load times (<2s)
- ❖ Efficient queries
- ❖ Cloud scalability (AWS)

➤ Usability:

- ❖ Intuitive and calm UI/UX
- ❖ Responsive design
- ❖ Accessibility standards (WCAG 2.1)

➤ Availability:

- ❖ Uptime target: 99.9%
- ❖ Monitoring tools (e.g., AWS CloudWatch)

➤ Maintainability:

- ❖ Modular code structure
- ❖ API documentation
- ❖ CI/CD pipeline

Conclusion:

The Contemplation Journal Web App is a comprehensive, wellness-focused digital platform combining emotional insight, guided journaling, and visual contemplation into a seamless and secure user experience.
